

Powering Your Sustainability Goals Forward

At Werner®, we understand the vital role sustainability plays for your business and for our planet. As a transportation leader, we're committed to being part of the solution, actively testing and validating new technologies to reduce environmental impact while helping you meet your emissions goals and driving long-term progress.

Our integrated solutions—spanning fuel-efficient equipment, alternative fuels and real-time emissions data—are designed to increase efficiency and support a cleaner, greener future. By partnering with Werner, you gain a trusted ally in building a supply chain that's environmentally responsible and built for what's next.

HOW WERNER SUPPORTS YOUR SUSTAINABILITY GOALS

SMARTWAY® LEADERSHIP & EMISSIONS REDUCTION:

As a SmartWay Partner since 2004 and recipient of the 2024 High Performer and Excellence Awards, Werner uses SmartWay tools to track emissions, improve fuel efficiency and support your Scope 1 reduction goals. Our reporting practices ensure alignment with industry benchmarks, giving you transparent insight into your sustainability progress.

FUEL-EFFICIENT, MODERN FLEET:

With one of the youngest fleets in the industry (average truck age around two years), Werner prioritizes fuel-saving technology—like aerodynamic trailer designs, low rolling resistance tires and automatic tire inflation systems—to reduce emissions and operating costs.

RENEWABLE ENERGY & ALTERNATIVE FUELS:

We operate trucks powered by renewable natural gas (RNG) and are adding 500 more to our fleet. We're also piloting biodiesel, hydrogen fuel cells and electric vehicles, helping prepare your supply chain for the future of green transportation while significantly lowering your carbon footprint.

REAL-TIME EMISSIONS & SUSTAINABILITY REPORTING:

Through Salesforce Net Zero Cloud and Workiva, Werner provides customers with detailed, real-time emissions data. These platforms support your sustainability goals with reports aligned to CDP, SASB and other global standards—offering the transparency and insights needed to guide corporate sustainability strategies.

SCALABLE, FUTURE-READY FREIGHT SOLUTIONS:

Our multi-modal solutions combine to create the best options for your supply chain. For example, our Intermodal offering blends rail and truck transport for a sustainable, emissions-reducing solution. These are further enhanced by our investments in next-gen technologies like autonomous, renewable fuels and hydrogen-powered trucks.

FUEL-SAVING DRIVER PRACTICES:

We train professional drivers in eco-driving techniques and use electric Auxiliary Power Units and idle-reduction technologies across our fleet to reduce fuel waste. These practices directly support emissions reduction and enhance your overall supply chain sustainability.

SUSTAINABILITY

OUR COMMITMENT TO NET-ZERO

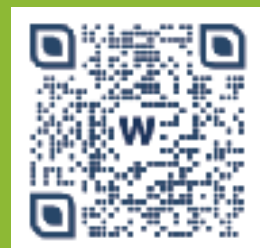

Werner is targeting a **55% reduction in greenhouse gas emissions by 2035**, guided by science-based targets and strategic investments in fleet innovation and clean energy. We report our progress each year in our **Corporate Sustainability Report**, reinforcing our commitment to transparency and action.

WORK WITH WERNER FOR A SUSTAINABLE FUTURE

When you choose Werner, you're choosing a partner committed to sustainability, innovation and accountability. Together, we'll power your goals forward—delivering smarter, cleaner solutions that benefit both your business and the planet.

Let's build a greener future—together.
